City of Redmond, Downtown Circulation Options

Redmond Way/NE 76th Street Couplet

Changes from existing

NE 76th Street increases to three lanes and becomes one-way only. Cleveland Street becomes a two-way street.

10

Opportunities

Potential for "Main Street" Environment on Cleveland Street

Flexibility of two-way access on Cleveland Street

Higher capacity couplet than existing.
More clearly defined couplet (fewer curves, clearer connections on ends)

Improved couplet connection on western edge (intersection not required)

Eastbound traffic has direct connection to Town Center

Challenges

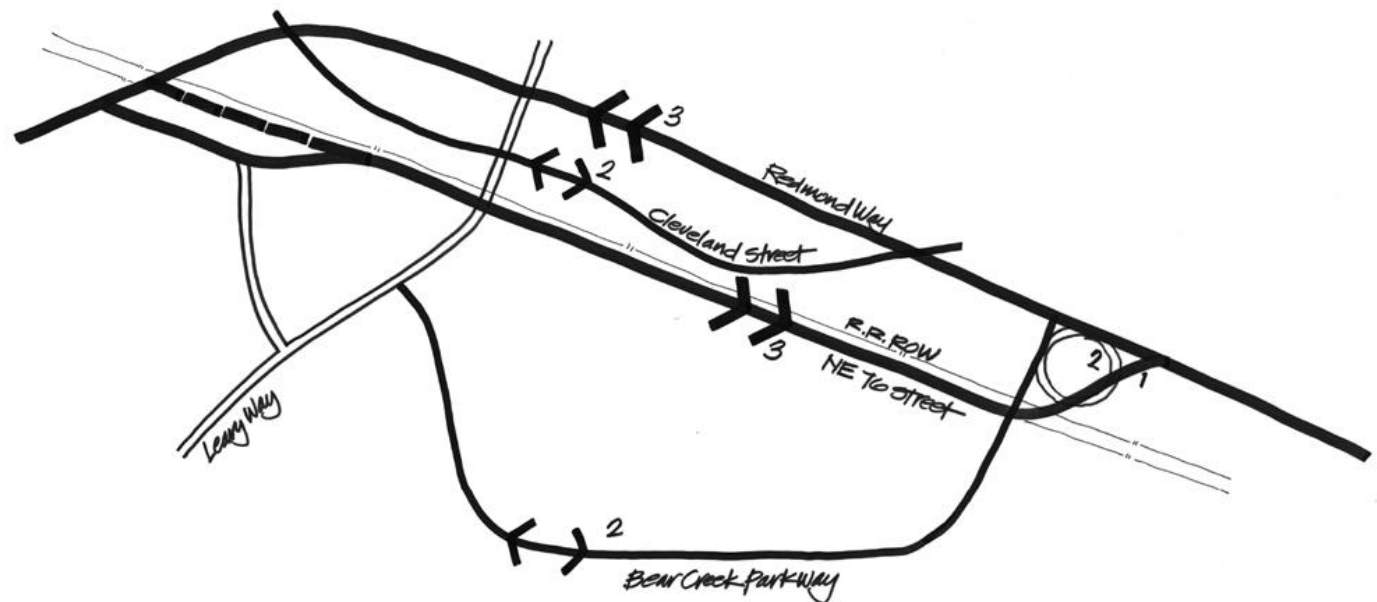

Requires new connections east and west

Uses some BNSF right of way

Reduces access to Town Center from 76th Street as a result of one-way traffic

Local circulation on 159 Place NE

Description: New one-way couplet formed with Redmond Way and NE 76th Street. Cleveland Street as local access emphasis.
